

# Wall Mounted Sink Installation Manual

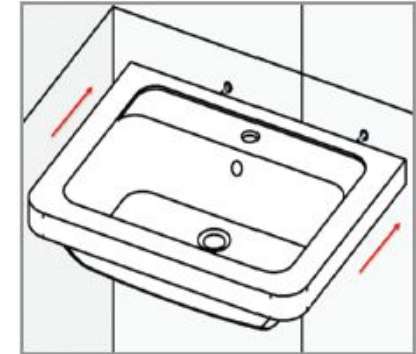

**Figure-1:**  
The dimension X between the mounting holes and the dimension Y indicating the height of the holes above the ground are marked on the wall in accordance with the catalog dimensions.

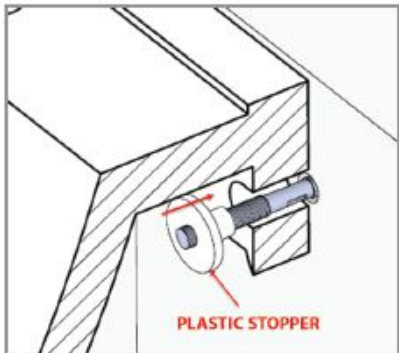

**Figure-2:**  
The dowel holes are drilled by using suitable drilling bit on the marked points and the dowels are attached in such holes.

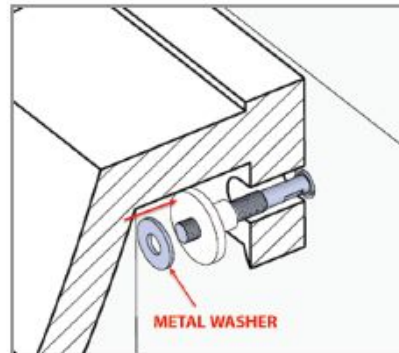

**Figure-3:**  
The mounting studs of the wash basin are attached to the dowels.

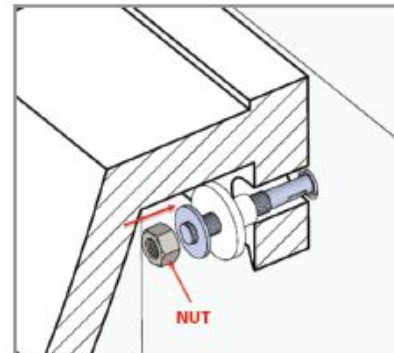

**Figure-4:**  
The wash basin is inserted to the studs through the mounting holes.

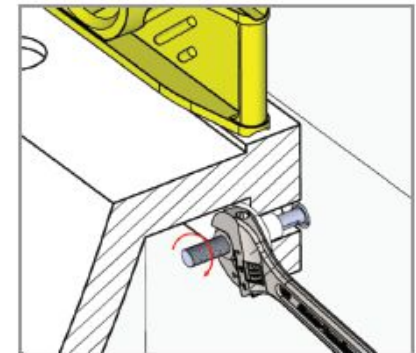

**Figure-5:**  
The wash basin is mounted to be on the studs by passing the plastic stopper through the stud.

**Figure-6:**  
The metal washer is attached by passing through the stud.

**Figure-7:**  
The hexagonal nut is attached by passing through the stud.

**Figure-8:**  
The wash basin is balanced by using water gauge and the installation of the wash basin is completed by tightening the nut completely.
